

Ayan Pratap Sonker

Full Stack Developer

Raebareli, Uttar Pradesh, India · +91-6393358683 · ayanpratap5@gmail.com · linkedin.com/in/ayan-pratap · github.com/AyanPrt43

SUMMARY

Full Stack Developer proficient in the **MERN stack** (MongoDB, Express.js, React.js, Node.js), **Next.js**, and **TypeScript**. Experienced in architecting secure, token-authenticated RESTful APIs, implementing relational and document database schemas, and engineering responsive frontends delivering sub-2s page loads and clean state management.

EDUCATION

Feroze Gandhi Institute of Engineering and Technology

Bachelor of Technology – Computer Science and Engineering (CGPA: 7.6/10)

07/2022 – 07/2026

Raebareli, Uttar Pradesh

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Context API, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT (Access/Refresh Tokens), Middleware, Input Validation (Zod)

Databases & Cloud: MongoDB, Mongoose, PostgreSQL, Firebase, Vercel, Netlify, Render

Developer Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD basics), Postman, Linux CLI, Bash

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, System Design Basics

PROFESSIONAL EXPERIENCE

Intellipaat

Web Development Intern

07/2025 – 07/2026

Remote

- Engineered 10+ responsive, cross-browser web interfaces using **JavaScript**, **TypeScript**, and **Tailwind CSS**, improving mobile rendering performance by 25%.
- Developed reusable component-based UI modules and streamlined state management, reducing code duplication across sprint deliverables by 20%.
- Managed collaborative feature branches, code reviews, pull requests, and repository versioning using **Git** and **GitHub**.
- Executed shell debugging scripts in **Linux** environments to expedite build resolutions and standardize local dev setups.

FEATURED PROJECTS

Task-Line – Full-Stack Task Management Application | [Live Demo](#)

React.js, Node.js, Express.js, MongoDB, Firebase

- Developed and deployed a full-stack task management platform using **React.js**, **Node.js**, **Express.js**, **MongoDB**, and **Firebase Authentication** with a responsive, production-oriented client-server architecture.
- Implemented secure **Firebase ID-token authentication** with protected Express middleware and user-scoped MongoDB operations, restricting task access to authenticated users.
- Built complete task workflows including **CRUD operations**, **task prioritization**, **date-based planning**, **search/filtering**, **important tasks**, **soft-delete recovery**, and **permanent deletion**.
- Designed a responsive **Tailwind CSS** interface with light/dark themes and adaptive layouts across desktop, tablet, and mobile devices.

TaskFlow – Project Management Platform | [Live Demo](#)

React.js, Node.js, Express.js, MongoDB, JWT

- Architected a full-stack project tracking platform with role-based access control (RBAC), nested subtasks, and real-time status workflows, maintaining sub-120ms API response times.
- Implemented a dual-token security architecture with **JWT** access/refresh tokens in **HTTP-only cookies**, bcrypt password hashing, and centralized Express error-handling middleware.
- Integrated transactional email workflows using **Nodemailer** for automated account verification and secure password reset pipelines.

E-Commerce Web Application | [Live Demo](#)

Next.js, TypeScript, Tailwind CSS, Node.js

- Developed a full-stack storefront featuring dynamic Server-Side Rendering (SSR), multi-criteria faceted filtering, persistent cart state, and type-safe data schemas.
- Designed 15+ strictly typed, reusable UI components in **TypeScript**, eliminating runtime edge cases and sustaining sub-2s initial page loads.

Real-Time Currency Converter | [Live Demo](#)

React.js, Vite, Tailwind CSS, REST API

- Integrated the **ExchangeRate-API** to deliver live valuation updates across 150+ global currencies with real-time two-way rate conversion.
- Built a custom React Hook with a 300ms debounce and state caching layer, reducing redundant network requests by 65% with zero cumulative layout shift (CLS).

Fintech Landing Experience (Razorpay Clone) | [Live Demo](#)

React.js, Tailwind CSS, Responsive UI

- Recreated a modern fintech dashboard and payments showcase using utility-first **Tailwind CSS**, optimizing complex grid layouts for 100% viewport fidelity across all devices.
- Built interactive micro-interactions, accessible modal systems, and responsive payment cards, achieving a 95+ Google Lighthouse performance rating.

CERTIFICATIONS

- **Introduction to Prompt Engineering with GitHub Copilot** – GitHub (2026)
- **Web Development Certification** – Intellipaat
